

## **CAIN AND ABEL BIBLICAL MYTH, “HU-MAN DIETARY DILEMMA”, TREE OF KNOWLEDGE OF GOOD AND EVIL”**

**exoterically** the Biblical story of **Adam and Eve’s sons** with **fratricide** by the **gardener Cain** against his brother the **animal herder Abel**; and

**esoterically** the corruption of the truth that the **animal herder Abel** murdered his brother **gardener Cain** predicted earlier, with philologically this fable is the **basis of the word “cannibal” (cain-abel)** and epistemologically symbolizes the **“HU-man DIETARY DILEMMA”** of choosing to be a **vegan/vegetarian** or an **animal flesh and organ eater**; where **cannibalism** the next step of human flesh eating becomes a possibility in any emergency food situation like an airplane, boat, train, car or hiking stranding accident exemplified by the true and ironic **Moby Dick Saga** where sailors stranded by a hunted Sperm whale on a small boat choose **cannibalism** although island coconuts were available.
