

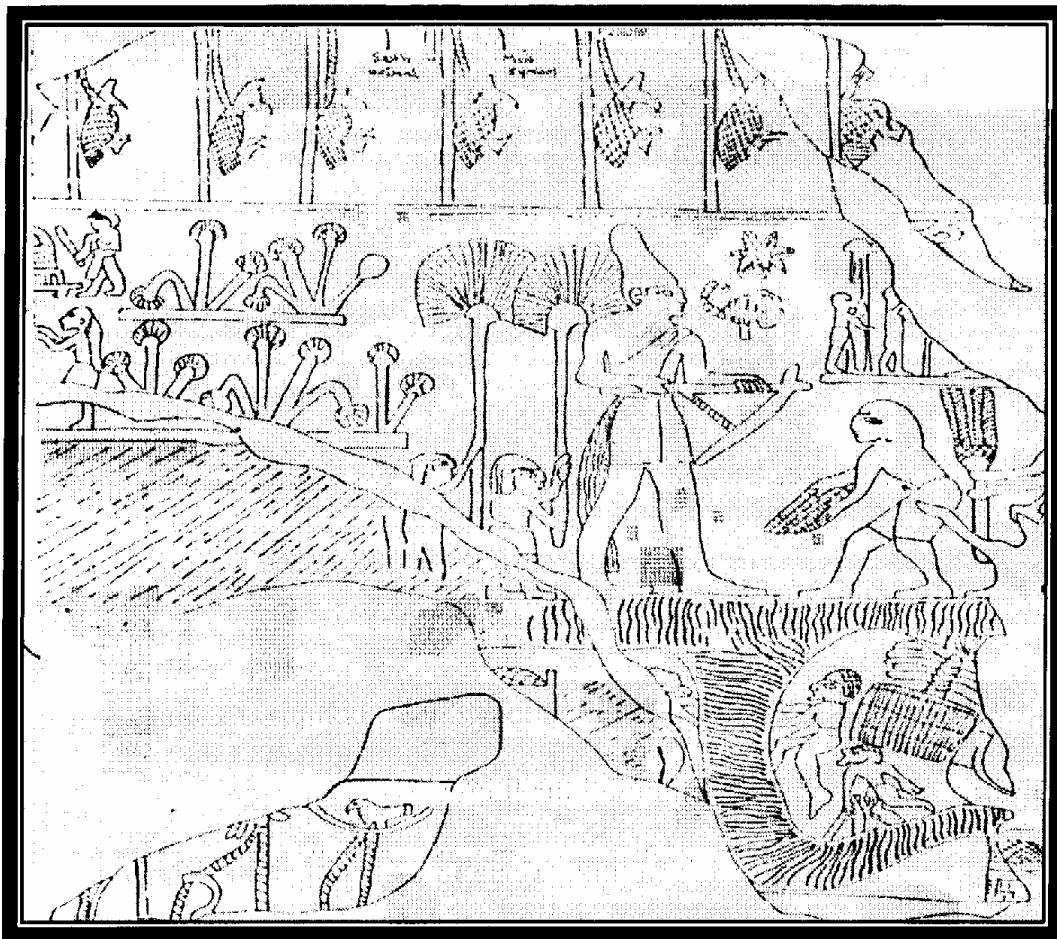

**EXHIBIT I \_J: Annu King Scorpion's (*An-Hetch*) Macehead: Garden of Eden/Sustainable Agri-Forestry Work with Pick Axe and Shovel**

From Arnett's Predynastic Origin of Egyptian Hieroglyphics, Plate L

**EXHIBIT NOTES:**

- The hieroglyphics before the “**Scorpien King**” transliterates as *An-Hetch* meaning “being of the power of light” \_\_\_ implying he meditates on the Inner Celestial Light of the Aten Path.
- The **Scorpien King** is wearing the so-called “Upper Egypt” crown as **King Narmer** in EXHIBIT I D-3. Compare with the **lion hunters** shown in EXHIBIT I K who wear short kilts and the **cow’s tail** of Sun Goddess Het Heru. This identifies the **Scorpien King** (*An-Hetch*) as a Annu (Priest) King of the Ancient Egyptian Mystery School of On (Annu), and ethnically related to the Anu Peoples of the Nine Bow Nations represented in EXHIBIT IV-2.
- **King An-Hetch** is working in a Sustainable Agri-Forest based “Garden of Eden”; for below workers are planting trees, one has also a pick axe as does the King standing behind **irrigation trenches**. Planting “deep” beds can be seen behind the King in the “Garden of Eden”, full of **sunflower** plants.
- **Militarily** one can appreciate the importance of “**food security**” and Garden of Edens/Sustainable Agri-Forestry in **Ancient Egypt/Kemit’s** military superiority and long **civilization preservation**. Clearly the **Anu peoples** are as much horticulturists as they are military conquerors. Obviously, the **Anu people** can make war, but their first passion is horticultural as this gardening figure is found on a ceremonial war macehead.
- Since this is a military mace head weapon, conquered enemies are shown hung as totem animal symbol, as well as totem standards of the victorious **Nine Bow Nations** supporting the King; i.e., the **Seth** peoples of the Annu Sethiu (aNubians) and the **Shasu Annu** (Semites) or those **Mentu** who worship the God **Min**, the falcon and jackal or wolf bands shown in EXHIBIT IV-2.
- The **sunflower** being a complete and easily digestible raw food, is “**phototrophic**” (following the sun) the only plant of its kind was developed by the **Ancient Egyptian Mystery School of On (Annu)** as a **complete prime vegetarian food** for its Aakhu-Hammemeṯ”Sun People” students, graduates and followers of the Aten Path.
