

**EXHIBIT I\_C-2: Predynastic [Great “Sphinx” HU Rock Sculpture](#) at Masterpiece at Giza, circa 10,500 B.C.**

**2. Northern view of Sphinx showing the [Giza Egypt Plateau Complex](#)**

(from Hancock and Bauval, [Message of the Sphinx](#), fig. 2, 1996)

**EXHIBIT NOTES:**

- “The [Sphinx](#) was carved by first excavating a large trench around a monolithic central core of limestone which was shaped into the form of a lion.”

“This photograph (above), taken from the Great Pyramid, shows the Sphinx in the trench, the remains of the so-called Sphinx Temple (immediately in front, i.e., to the east of the monument) and Valley Temple (a little to the South). Also shown, running down the south side of the Sphinx is the gigantic causeway of Khafre.” (Hancock & Bauval, [Ibid](#), 1996, pg. 176, figure 2)

- “The evidence presented in this book concerning the origins and antiquity of the monuments of the Giza necropolis suggests that the genesis and original planning and layout of the site may be dated, using the tools of modern computer-aided “archaeological-astronomy”, to the epoch of 10,500 B.C. We have also argued, on the basis of a combination of geological, architectural, and “archaeological-astronomical” indicators, that the Great Sphinx, its associated Megalithic ‘temples’ and at least the lower courses of the so-called ‘Pyramid of Khafre’ {the “second” whose foundation is made up of the natural rock of limestone at the Giza locations}, may in fact have been built at that exceedingly remote date.” ([Hancock & Bauval, ibid, 1996, pg. 303](#)) (**Emphasis Added**)
- **Esoterically**, the “lost people civilization” conceptualized by authors de Lubicz, West and Schoch black African [Anu Peoples](#) who established the [Ancient Egyptian Mystery School of On \(Annu\)](#) and the civilization known as ancient Egypt. The Sphinx is shown with the cobra\ureaus on its head, indicating the [Aten Path](#) existed at 10,500 B.C.
- As to the logical question of what similar monuments existed contemporary with a Sphinx built in 10,500 B.C., i.e., by the **Ancient Egyptian Mystery School of On (Annu)** esoterically it must be realized that the ancient historian [Manethos](#) and [Herodotus](#) both report the first dynasty beginning around 8,000 to 9,000 B.C. Thus the remnants are there but not recognized, e.g., many pyramid remnants exist in mounds of rubble but can not be identified as to builder or time of construction.
