

**EXHIBIT IV\_C-1 :: 18th Dynasty Queen Hatshepsut's [Expedition to Punt](#), *Sheba, Meroe* and [Khenthunnefer](#): King and Queen of *Punt*  
Welcome Expedition Wall Relief**

**II. King and Queen of *Punt* Welcome the Egyptian/*Kermit* Expeditionary Force**

(from Smith, William Stevenson; "The Land of Punt", [Journal of the American Research Center in Egypt](#), Bk. 1, Boston, MA., 1962)

**EXHIBIT NOTES:**

- The body of water is an ocean and undoubtedly the Red Sea with salt water animals identified including a shark, sword fish and sea turtle.
- The grossly obese Queen of *Punt* is detailed and discussed in [EXHIBIT IV C-3](#). Note that her daughter standing behind her is not obese as of yet.
- The people of *Punt* live in huts on poles for beach front flood water protection, the same **huts on poles** used today in the Sudan Nile River Valley as seen in [EXHIBIT IV D-5-1](#).
- They live in a [Sustainable Agri-Forest](#) with integrated forest incense trees and orchard palm trees described further in [EXHIBIT IV D-5-2](#).

**EXHIBIT IV\_C-2 :: 18th Dynasty Queen Hatshepsut's [Expedition to Punt](#), *Sheba*, *Meroe* & [Khenthunnefer](#): King & Queen of *Punt* Bring Tribute Wall Relief**

**II. King and Queen of *Punt* Bring Tribute to Egyptian/*Kemit* Expeditionary Force's Camp**

**EXHIBIT NOTES:**

- Note that the Puntians bring Tribute a second day directly to the land camp of the Egyptian Naval Expedition away from the Red Sea beach area using donkeys to carry the merchandise and including cattle. The source of the wealth they bring as tribute is the [Sustainable Agri-Forest \(SAF\)](#) wherein they live in their pole huts and tend to daily. Their **SAF** produces precious woods like ebony, sandalwood and [the precious gum tree incenses frankincense and myrrh](#), and is described further in [EXHIBIT IV D-5-2](#).
- Cattle were introduced into Africa by the Invader People and are seen throughout the relief, and are returned to **Egypt/*Kemit*** as tribute. Yet cattle are used for dairy products only by most people of the Egyptian civilization and its African continent tributary nations except perhaps the **Puntians** judging by the extreme obesity of the Puntian Queen.
- **Note** that at this stage African wildlife are missing in the tributes from ***Punt*** the; e.g. leopards, giraffes, baboons. Such animals will be captured in the subsequent land safari to ***Sheba*** or what we now call the “highlands” of Ethiopia, to ***Meroe*** what we now call the “lowlands of Ethiopia around **Lake Tana** and [Khenthunnefer](#) of the Central African Great Lakes in the next [Exhibits](#).
- Note that their **pole huts** are the same as found on the Nile River to this modern day as shown in [EXHIBIT IV D-5-1](#).
