EXHIBIT IV_D-2

EXHIBIT IV_D-1b

(W. S. Smith, "The Land of Punt", Journal American Research Center in Egypt, Bk. 1, Boston, MA., 1962)

EXHIBIT NOTES:

- This portion of the **Queen Hatshepsut Naval [Expedition to Punt](#) Wall Relief** is extremely vandalized and has been restored using computers by **William Stevenson Smith** presented in "**The Land of Punt**", Journal of the American Research Center in Egypt, Bk. 1, Boston, MA., 1962. An enlargement of a section of this composite 4 level wall relief is presented as [EXHIBIT IV D-4-2](#).

The above computer enhanced wall relief from the **Pharaoh Queen Hatshepsut Deir el Bahari Burial Temple** restores portions of the 4 levels of detail of the land safari into the "*land of the ancestors/gods*" (*Ta Neter*) commissioned by 18 th Dynasty Pharaoh-Queen Hatshepsut. It shows not only for the first time a **male giraffe** in the left corner of level three but a **hippopotamus**, **baboon** and **cattle** in the left corner of level four, a **leopard** in the center of level four.

- **A historical corruption pattern emerges because a male giraffe** appears for the **first time** in this 1962 computer restored **Queen Hatshepsut Deir El Bahari Temple Wall Relief Record of the Punt Expedition**. For nearly 100 years since the appearance of the drawings by Egyptologist Auguste Marriette in 1877 and Egyptologist E.G. Naville in 1898 the existence of a **male giraffe** in the interior of mysterious "Ta Neter" was hidden in this heavily vandalized part of the *Deir El Bahari Temple Wall Relief Records*.
- Each of the 4 levels of the 1962 **American Research Center in Egypt** computer enhancement are separated, enlarged and presented as [EXHIBIT IV D-1b](#), [EXHIBIT IV D-2](#), [EXHIBIT IV D-3](#) and [EXHIBIT IV D-4-1](#).
- Thus conclusively the **Queen Hatshepsut's Punt Expedition** encountered a **male giraffe**, a **hippopotamus**, a **baboon** and **leopard** on its land safari into the jungle interior of the country of [Sheba](#), the country of [Meroe](#) and final destination of the country of [Khenthunnefer](#) of the Nile Great Lakes Region. All but the **hippopotamus** are captured and taken back to Ancient Egypt/*Kemit* as shown in the remaining part of the **Queen Hatshepsut Deir El Bahari Temple Wall Relief Record of the Punt Expedition**. Refer to [Map 7](#) of the Nile River Valley to appreciate the geography of the **Punt Expedition** landing in Punt on the **Red Sea** and taking a *land safari* across **Sheba (Ethiopia)** and on to the Nile River Valley area of the **Great Lakes of Central Africa**.
- **Please note** that a study of the 4 levels of the Interior of **Ta Neter** as a whole shows a predominant [Sustainable Agri-Forest](#) with precious [Frankincense and Myrrh Trees](#), Palm Oil, Coconut and other valuable forest hardwoods wherein the people live in **huts on poles with ladders** and tend the **Sustainable Agri-Forest**.
