

**CD-ROM E-BOOK THE EGYPTIAN MYSTERY  
"SCHOOL OF ON (ANNU)" BY GEORGE W.  
SINGLETON 2004 REVIEW BY  
THE BLACK TURTLE NATION**

"Attaining mastery of our basic needs (food, clothing and shelter), building and stabilizing an economy, and developing Education Systems that teach our children trades, as well as how to be productive members of autonomous communities are all goals that are heavily emphasized by **Black Turtle Nations** and the **Alternative Agro-Science Institute of Technology**."

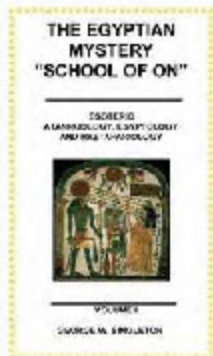

"Thus, we are pleased to announce that **Black Turtle Nations** and the **Alternative Agro-Science Institute of Technology** will be active participants in the **12 Element Sustainable Agro-Forestry (SAF) Community and Asset Development Model** as initiated by George W. Singleton, *Executive Director of BRCA/Hope LA-USA Project, Inc.* and author of **CD-ROM e-Book, The Egyptian Mystery "School of On (Annu)": Esoteric Attannology, Egyptology and Rastafariology.**"

"Training and implementing the **12 Element Sustainable Agro-Forestry (SAF) Community and Asset Development Model** will "when properly installed and operated minimally produce on 1 acre of land annually 150,000 pounds of *certified organic* food and provide 4 full time jobs at twice the minimum annual agricultural worker wage in a specific location." (G. Singleton, 2003)"

"Mr. Singleton developed this Model based off of the longevity and prosperity achieved in the agricultural systems in Ancient Egypt/*Kemit*. The people of Ancient Egypt/*Kemit* did not have the problems of poverty, economic depravation, crime, disease, malnutrition, hunger/starvation, or many of the other problems that exist today due to Chronic Poverty. '**Sustainable Agro-Forest** based agricultural economies produced long lived civilizations free of Chronic Poverty and thus capable of producing profound artistic, cultural, scientific and spiritual achievements.' (G. Singleton, 2003)"

"Singleton's e-book further explains how the Ancient Egyptians/*Kemetians* used Vermiculture (intensive earthworm cultivation) based animal husbandry based agricultural environment. The **12 Element Community & Asset Development Agricultural knowledge** for members of horticultural systems as opposed to system, which is more taxing on the **Sustainable Agro-Forestry (SAF) Model** is an excellent tool to increase indigenous communities."

"This powerful **Sustainable Agro-** and when applied will afford the **Black** attain one of our major Agricultural and **Book The Egyptian Mystery Attannology, Egyptology and** story on how Ancient Egyptian/*Kemetic* sustain the people off the land and to have been duplicated to his day!"

**Forestry (SAF)** system is practical **Turtle Nations** the opportunity to Educational goals. The **CD-Rom e-"School of On (Annu)": Esoteric Rastafariology** gives "The Real" Pharaoh's and rulers were able to produce a culture so great it has yet
