Yasmine Latiffe No Panties Flash At Cannes

June 4, 2008 |

French actress Yasmine Latiffe gave an incredible shot up her skirt while at Cannes as she flashed her delicious pussy and let everyone know that she prefers not to wear panties. Red carpet shows would be a lot more fun if more stars participated in giving watchers this kind of view!

Absolutely a fantastic display of exotic and erotic fine art female modeling and photography of female beauty including dress, hair, modeling attitude, face, body, body language played out at the 2008 Cannes Film Festival in France.

Ms. Yasmne Latiffe is indeed a most divine “Earth Love Goddess” sent by God to break up the backward but “civilized world” stance wiping out over 4,000 years of female human toiletry and “female problem” prevention of sickness knowledge that the vagina must be at almost all times incased in a “cloth chastity belt” called panties or knickers with perhaps panty hose over these.

The source of this strange and unhealthy practice is from the Queen Elizabeth era of Great Britain’s domination of the world and was adopted from the leuchorrhoea (the “whites”) condition of British women eating the English diet of 75% meat and dairy products giving the characteristic “fish smell”.

Somehow if a woman has no panties on she is vulgar and promiscuous. Duh?

With the invention of the absorbant knickers/panties this temporary solution to the above specified female health problem then snow balls to excessive menstruation more than 3 days and ultimately to ovarian cancer, cervix cancer, womb cancer and vaginal cancer and 500,000 hysterectomies a year in America alone!!!

This is fully document analyzed on my web page www.theuniversityofgod.org/Page8.html and www.theuniversityofgod.org/Page25.html and involves the ancient health technology of the aboriginal “amenses condition of women” or no menstruation in healthy women practiced in ancient Egypt, Greece and Israel and many Native American cultures.

Esoterically, the Bible’s Gospel describes that the Essene Israelite woman Mary who bore Jesus Christ as having an “immaculate conception”; and that her sister Sarah who bore John the Baptist followed a strict vegan diet devoid of alcohol because as Nazerite Priestesses of the Essene Israelites they would be ‘amenses’ and wore no panties/knickers as the history of female toiletry documents.

US entertainment devas Paris Hilton and Brittany Spears are constantaly being derided in the press because they dare go “commando”.

However, because Deva Miriah Carey is so popular, does not exhibit any of the other “bad girl” traits like Hilton and Spears do; so the press has not been able to damage her as yet as she too goes sans panties. In fact Mariah allows her male fans like me to see her photographed sans panties periodically as her fans want her to pose for Playboy or Penthouse and are going crazy to see her legs considered the best in America.

To her great credit Mariah Carey __ a woman of God__ is moving toward being an impeccable “Earth Love Goddess” having recently adopted the vegan diet and thus her menstruation should be 1 day within 30 days so qualifyting her as impeccably “amenses”.

As a BA. in Biology, 1970 from the University of Chicago (pre-med) and a Doctor of Herbology (1986 apprentice of Dr. Alfred “Roots” Patterson) I have gone “commando” and been vegan for over 30 years and have no Erectile Dysfunction, never had an STD nor prostrate problems at all at 58 years of age. I advise all my male network members to go “commando” as well as become vegan to avoid “male health” problems and extend their life.

Indeed this most divine display of erotic and exotic female fine art pics by Ms. Latiffe are not pornography in any sense.

Predictably it would be a French woman and international venue as the French women have always resisted the Great Britain “knicker/panty” standard of so-called proper female tioletry.

French women compared to Great Britain women eat a far more fresh vegetable and fruit diet having an average 3 day menstruation compared to 5 days for the latter and have thus no leuchorrhoea problems.

Thus most French women smell like human roses instead of smelly fish because of it. (smile)

Viva the Cannes Film Festival, France and French women like the Earth Love Goddess Ms. Yasmne Latiffe for showing the way!!
